

IN THE CLAIMS

Please cancel claims 3, 8, 9, 12, and 13. Please amend claims 1, 2, 5 and 10. Please enter new claims 16, 17, and 18.

1. (Currently Amended) A golf club head for an iron-type golf club comprising:  
a golf club head portion having a front face, a sole, a toe, and a heel portion, said heel defining a front heel face which defines a plane and which intersects a plane defined by said front face of said club head portion; and,  
~~an aperture defined in a said front face of a said heel portion, the aperture having an axis substantially perpendicular to the heel face surface.~~
2. (Currently Amended) A golf club head according to claim 1 wherein said club head further comprises a hosel having a first end and a second end, a first end of the hosel reversibly engaging said aperture in a second end of said hosel adapted for receiving a shaft.
3. (Canceled)
4. (Original) The golf club head according to claim 1 wherein said heel face further defines a wedge-shaped member, said wedge-shaped member having a bore therethrough, said bore in alignment with said aperture, said bore and said aperture adapted for receiving a first end of a hosel.
5. (Currently Amended) A golf club comprising a club head having a front face, a sole, a toe, and a heel, said heel defining an aperture extending through at least one of a front face or a rear face of said heel, said aperture adapted for receiving a hosel therein[.]; and,  
said front face of said heel defining a plane which intersects a plane defined by said front face of said club head.

6. (Original) The golf club according to claim 5 wherein said aperture extends from a front surface of said heel.
7. (Original) The golf club according to claim 5 wherein said aperture extends from a rear surface of said heel.
8. (Canceled)
9. (Canceled)
10. (Currently Amended) A golf club comprising:  
a club head having a front face, a sole, a toe, and a heel, said heel defining a bore extending into at least one of a front surface or a rear surface of said heel, said heel defining a front heel face having a plane which intersects a plane defined by said front face of said club head; and,  
an angled hosel having a first end inserted into said bore and a second end attached to a shaft.
11. (Original) A golf club according to claim 10 wherein said heel has a front heel face defining a plane which is coplanar to a plane defined by said front face of said club.
12. (Canceled)
13. (Canceled)
14. (Original) A golf club according to claim 11 wherein said bore is perpendicular to at least one of said front surface or said rear surface of said heel.

15. (Original) A golf club according to claim 11 wherein said bore defines a non-perpendicular angle to said at least one of said front surface or said rear surface of said heel.

16. (New) A golf club head according to claim 1 wherein said club head defines a gap beneath said heel.

17. (New) The golf club according to claim 5 wherein said heel defines an upper edge and a lower edge, said upper edge and said lower edge being parallel, said heel having a height less than a height of said club head.

18. (New) The golf club according to claim 10 wherein a lower edge of said club face defines a plane parallel to a plane defined by a lower edge of said heel face.
